

ILLUMINA SEQUENCING SERVICES

Fast, Reliable and High Quality NGS Library Prep and Sequencing

Service Highlights

- Work with the Sequencing Experts
 - Our team consist of experienced former Illumina scientists who specialize in next gen sequencing and sample preparation
- Stringent Quality Controls
 - All samples are tested and verified to ensure high quality libraries
- Low Input Requirements
 - Requires as little as 1ng of DNA or RNA starting material
- Custom Sequencing Project Services
 - Expert experiment design available for maximum data quality
- State of the Art Technology
 - Illumina MiSeq v2 capable of 2x 250bp reads with 8GB of output
 - Genome Analyzer Iix capable of 2x 150bp reads with 95GB of output
- Fast, Hassle-free Service
 - Express service available with 3 day turnaround time

Services

- RNA and miRNA Sequencing
- Genomic DNA Sequencing
- Exome Enriched DNA Sequencing
- PCR Amplicon Sequencing
