

Bacterial Genome Sequencing

Fast, Reliable and High Quality Library Prep and Sequencing Services

Service Highlights

- **Comprehensive service**
 - We offer DNA extraction, library generation, sequencing, and data analysis services.
- **Prepare libraries from difficult samples**
 - We have experience working with difficult samples such GC rich, and repetitive genomes.
- **Stringent Quality Controls**
 - All samples are validated to ensure high quality sequencing data
- **State of the Art NGS**
 - Illumina MiSeq capable of up to 25M reads and read lengths of up to 2x300bp
