

miRNA Sequencing Services
Comprehensive High Quality miRNA Sequencing

Service Highlights

Work with miRNA Sequencing Experts

- SeqMatic was founded by scientists who developed Illumina miRNA kits
- Proprietary TailorMix™ miRNA kit offers superior results from difficult samples (blood, plasma, saliva, etc.)

Profile any miRNA

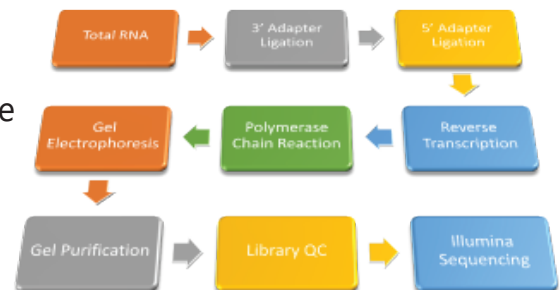

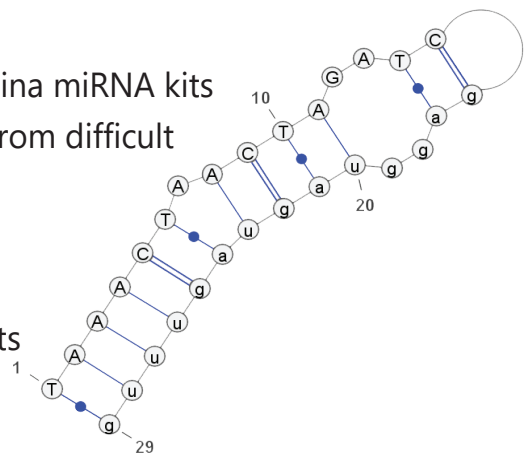

- Find all miRNAs from any source, including rare transcripts and variants, without the need for reference genomes

Low Input Requirements

- Optimized for 10-100ng of total RNA
- For lower inputs contact your SeqMatic representative

Stringent Quality Controls

- Libraries are validated to ensure quality and purity

NGS miRNA Workflow
